

## Product Description

Weaving building materials are a new type of building materials that are green, environmentally friendly, and full of natural beauty. They are made of natural bamboo, rattan, PVC, and other materials. Bamboo weaving technology has a long history, is strong and durable, and can be widely used in indoor and outdoor floor, wall, ceiling, and other decorations; rattan weaving is light, flexible, and transparent, and is often used for indoor furniture and landscape decoration. PVC material is easier to bend and form in terms of technology and has strong weather resistance, so it can meet a variety of design needs. The materials of the woven series are simple and natural, highly decorative, and have a natural flavor that metal materials do not have. Compared with wood and stone, woven materials are more breathable and have a refreshing feel, which complements the warm and natural decorative style.

## Description

Bamboo weaving uses natural bamboo material, which exudes a unique natural flavor and woody fragrance, bringing a natural closeness and warm atmosphere to the building. Its finely woven structure can cast charming shadows under sunlight, creating a unique light and shadow effect, adding layering and changing beauty to the building. As a unique building material, through the combination and splicing of bamboo weaving, various unique patterns and geometric shapes can be created, adding rich artistic elements to the building, and allowing people to enjoy the blend of nature and art.

## CASE APPRECIATION STARMAX

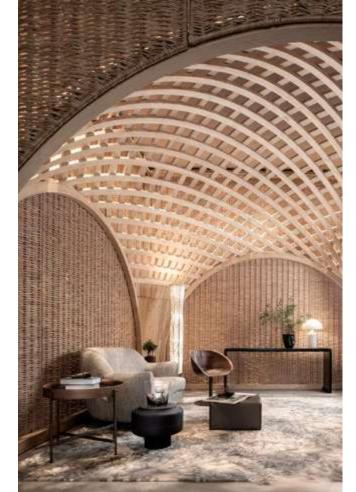

# Description

Rattan weaving is mainly made from rattan skin or young rattan core. It usually involves beating, picking, washing, drying, twisting, planing, peeling, bleaching, dyeing, weaving, and painting. Several processes take full advantage of the characteristics of rattan which are soft and not easy to break. Rattan is strong and durable, not only not easily deformed, but also insect-proof and moth-proof. In terms of color, rattan weaving mostly uses the light yellow color of the original rattan, but it can also be bleached and colored in white or ivory, which makes it appear soft and elegant. Some are paired with coffee, brown, etc. Rattan materials have the characteristics of natural beauty, lightness, durability, breathability, and environmental sustainability. It is commonly used in the production of furniture, decorations, and wall partitions.

# CASE APPRECIATION STARMAX

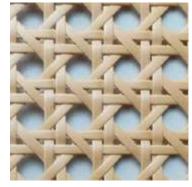

# Description

PVC weaving is a modern alternative to bamboo and rattan weaving. It has a realistic appearance, is flexible and strong, and is suitable for indoor floor and wall decoration. Different from the limitations of natural materials, PVC weaving has more choices in styles, which can meet the decoration of different building projects. And compared with the weaving of bamboo and rattan materials, PVC weaving performs better in terms of moisture resistance and corrosion resistance and is both beautiful and practical.

# CASE APPRECIATION STARMAX

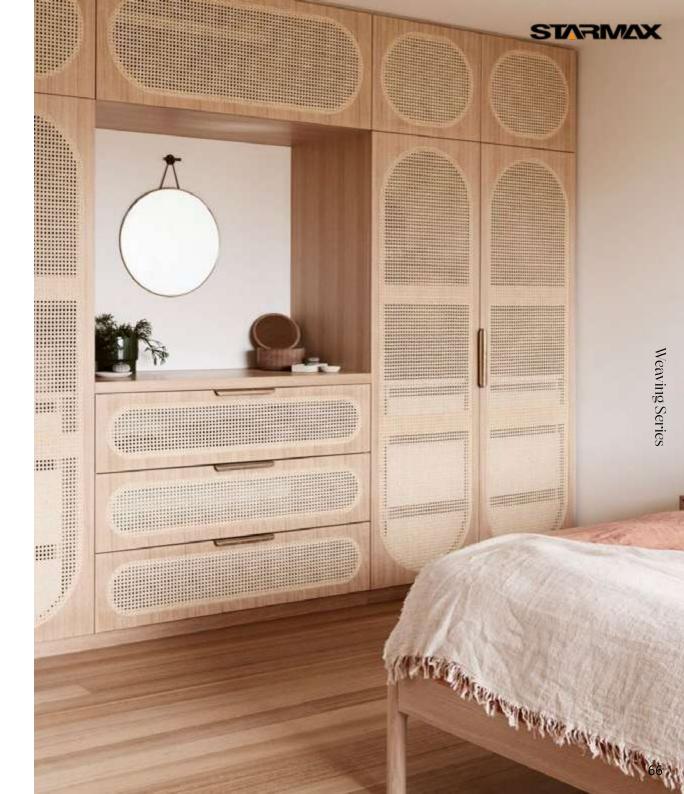

# Tensioning technology of rattan knitting strip

### Preparation:

- 1. Mesh rattan: Soak in warm water for about 30 minutes.
- 2. Rattan core: If the width of rattan is less than 60CM, it is recommended to use a rattan core with a diameter of 5-6MM f the width of rattan is more than 60CM, 7-8 mm diameter of rattan core is recommended.
- 3. Martin: It's used to hammer nails and press strips.
- 4. Personnel: 2-3 people.

### Production:

Step 1: Press the first long edge.

Points to note:

STARMAX

- (1) Alian the mesh with the grooves.
- (2) The vine core is pressed into the hollow center of the mesh.
- Step 2: Press the first short edge.
- Step 3: Press the second long edge.
- Step 4: Press the second short edge.

### Note:

- 1. Bamboo woven materials and PVC woven materials can also be installed by referring to this method.
- 2. Real rattan materials need to be soaked in warm water for 1 hour (Soaking time can be flexibly arranged).
- 3. PVC rattan materials do not need to be soaked and can be assembled and tightened directly.

# Company Profile

Founded in 2004, STARMAX is a company dedicated to the procurement of new architectural materials. Its service targets include designers, architects, construction companies, design companies and other professionals and institutions related to the architectural design industry.

Our products cover various new building materials such as pouring panels, wall panels, components, coatings, etc., with tens of thousands of styles, which can meet the needs of different projects. In order to better serve customers, STARMAX has established long-term cooperative relationships with the world's top suppliers of new building materials. We firmly believe that high-quality and innovative materials can bring more possibilities and creativity to the architectural design industry, and at the same time improve the quality and value of projects.

# How We Help Designers

Sifting through endless options online, creating dozens of new accounts, digging through supplier information, running a business while keeping track of the full content of purchased materials...have you ever felt like, it's a hassle more than once?

Every stage of the interior design process will be easier and more efficient when you have an efficient purchasing assistant!

STARMAX is a company dedicated to the procurement of new building materials, serving professional designers.

With our 18 years of sourcing experience and strong supplier background, you can draw inspiration from our vast library of building materials to turn any idea into reality.

We have over 135,000 products from over 1,700 suppliers worldwide.

Get in touch with us, and you will get free building material samples, exclusive material guides, annual building material trend collections and detailed price lists provided by STARMAX. You can choose directly from our wide range of new material options, or provide your ideas and models to our business staff.

- No project style restrictions;
- No need to create an account;
- No extra charge;
- After the order is completed, the shipping fee will be refunded in full;
- Screen multiple suppliers for comparison;
- Help procurement cost control.

In addition, we can also help you obtain first-class FF&E, OS&E procurement solutions. We can provide you with any level of design assistance you may require. We will be an extension of your team, supporting you with budgeting, product consulting, value engineering and procurement.

Whether you are an architect looking for innovative materials, a designer needing a special order, or a supplier of new products for your company, STARMAX can help you find what you need.

### Our Team

The STARMAX project team is composed of experienced industry elites, including procurement team, business team and construction new material professionals, who always focus on business and partners' commercial success. Through efficient communication, we understand customer needs, customize innovative, competitive and cost-effective procurement solutions for customers, and supervise production and logistics in a timely manner to ensure that orders are delivered on schedule and projects do not miss the best time.

### Our Mission And Vision

STARMAX is committed to providing innovative, environmentally friendly and high-quality new building materials for the architectural design industry, creating more possibilities for customers and creating a better future for society.

## Product Supply Chain

After years of accumulation and hard work, STARMAX now has a large operation service team and rich experience, providing customers with a full range of integrated services from product development, production, OEM, procurement, agency, import, warehousing, logistics services to sales services.

Therefore, in addition to providing material procurement services, STARMAX also provides customers with one-stop services related to hotel business, including hotel renovation, hotel interior design, hotel product research and development, etc.

STARMAX

In the past 18 years, STARMAX has provided a complete set of renovation solutions for 1000+ hotel owners around the world, as well as related hotel products such as bedding, bathroom linen, tableware, furniture, and hotel personal product sets. Partners are located in more than 200 countries and regions around the world, including North America, Europe, Asia, Central America, the Middle East, Africa, etc.
